

# International payments made simple

Single payments API access to Swift network and Goldman Sachs FX liquidity

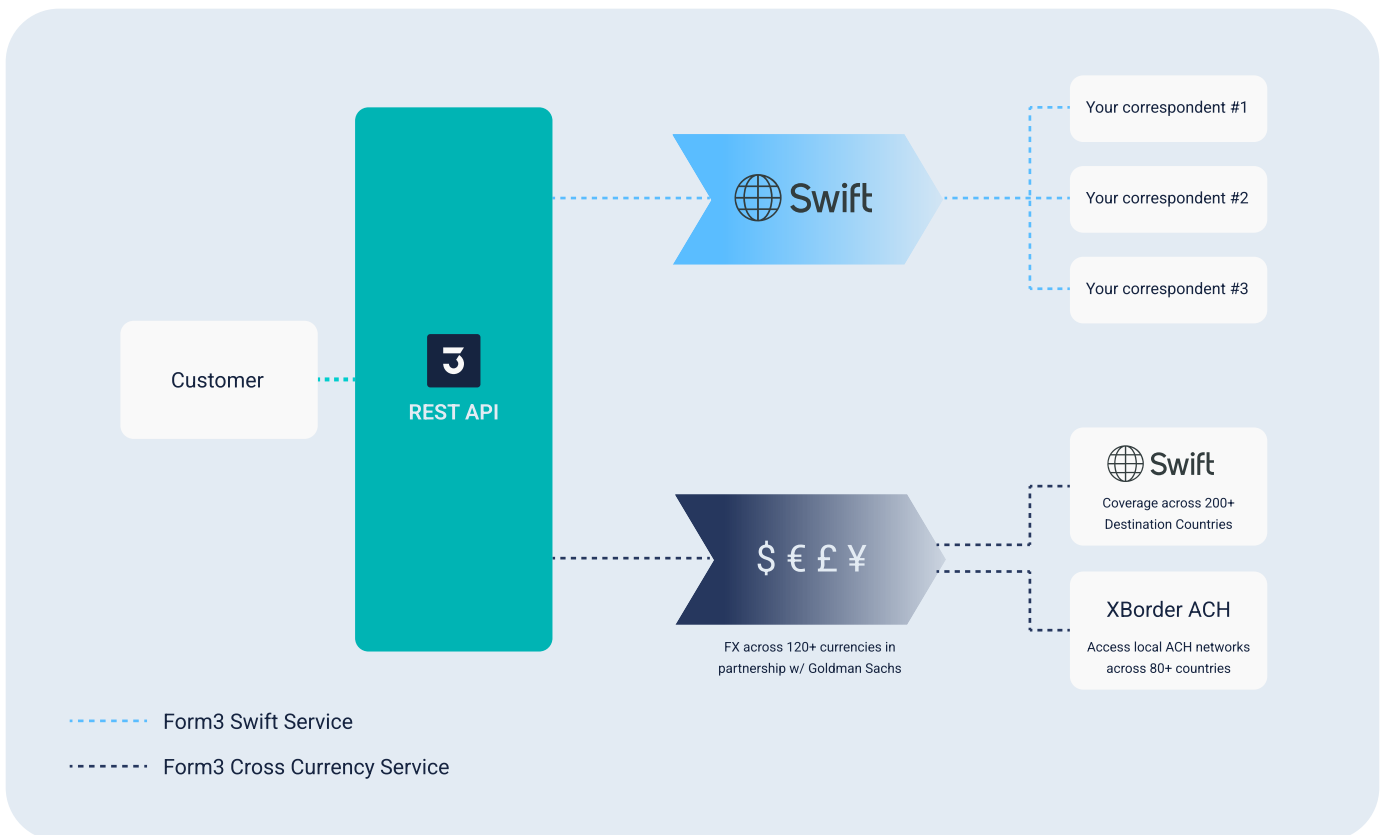

Introducing Form3's "International Payments as a Service" - a comprehensive, streamlined solution designed to revolutionize international payment processing for financial institutions.

Seamlessly combining our innovative "Cross Currency" and "SWIFT as a Service" offerings, this groundbreaking solution simplifies global transactions all through a single payments API.

## How it works

Leverage the power of direct Swift connectivity to efficiently manage and expand your correspondent network, while tapping into the extensive capabilities of Goldman Sachs as a direct liquidity provider, granting access to 120+ currencies.

Our all-in-one solution reduces transaction costs, accelerates processing times, and provides a competitive edge in the global market.

Embrace the future of international payments with Form3's "International Payments as a Service" - the key to unlocking enhanced customer experience, optimized risk management, and unrivaled scalability for your business.

# Tailor your approach to your international ambitions

## Solution

### International Payments and FX Services in Partnership with Goldman Sachs

Experience seamless international payments and foreign exchange services through our partnership with Goldman Sachs

## Benefits

- Gain immediate access to an established global network, covering 120+ currencies in 200+ countries via SWIFT, and 80+ local ACH networks.
- Receive competitive real-time forex rates via API.
- Utilize a private label solution, allowing you to fully control the branding and end-user experience..
- Optimize your liquidity by minimizing nostro exposure.

### Swift as a Service

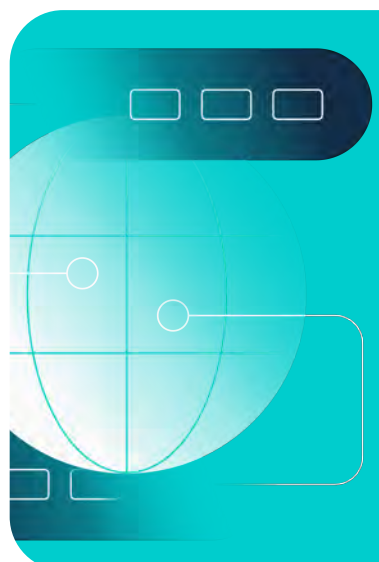

Effortlessly access the Swift network through our user-friendly Payments API

- Simplify Swift connectivity with a fully managed, cloud-native API service.
- Expand and manage your correspondent network efficiently.
- Decrease the complexity of back-end technology and operations management.
- Stay future-proof with insulation from network changes such as ISO 20022 and Swift annual releases.
- Retain existing FX revenues and gain access to liquidity management tools.

### Leverage the Best of Swift and Cross Currency Services

Strategically focus your resources and offer comprehensive global coverage across all markets

- Enjoy the combined benefits of both Swift and Cross Currency services.
- Strategically grow or maintain your correspondent network in select regions and corridors that align with your business strategy.
- Use the existing global network via a private label service to offer extensive global coverage in regions without a correspondent network.
- Optimize liquidity and allocate resources more strategically.
